Dimensions

Length: 200mm

Width: 200mm

Height: 4,4mm

Material

Material: PLA

Layer height: 0,2mm

Support: No

Brim: Recommended

Instructions

Due to its dimensions, this chess set should be printable on nearly all FDM 3D printers. Feel free to scale it up or down to fit your needs.

To print the two-colored board, note that **the black tiles are 0,4mm higher than the white tiles**. I recommend to start the print in white and change the color to black for the last two layers.

Another option would be to print the board in one color and paint half the tiles.

If you have trouble printing all the pieces together, I also included the files of the individual pieces. Brim is recommended for printing the pieces.

Enjoy and don't fall for a scholar's mate. 😊
