Tags: [baby](#) [soda](#) [milk](#) [bottleholder](#) [candleholder](#) [medela](#)

A baby milk bottle holder for 6 bottles or small soda cans. I made it with Medela bottles in mind. Easier to store and move it all around.

There are 2 different handles. One longer for cans and one shorter for baby milk bottles.

Assembly:

Take both the upper and lower layer and place it diagonal between the handle's legs. let the lower layer fall in place and then do the same for the upper layer.

Note: Load the bottels from the middle out, so the weight distribution don't make the layers tilt.

Everything can be printed on a small bed and is easy to assemble.
