Print your own 1:490 scale (estimated) model of the Northrop Grumman B-21 Raider aircraft! The B-21 Raider is designed with advanced stealth technology to make it virtually invisible to radar. Its shape, materials, and

coatings minimize its radar cross-section. This flying-wing bomber uses clam-shell flaps for yaw control, which is pretty stinking cool!

There is a landing gear and no-landing gear version. There is also a version with a pitot probe as a flight-test version.

Please post makes!

Suggested layer height : 0.2 mm

Suggested nozzle width : 0.4 mm
