Summary

Quarter circles to hold your cooking utensils in a lazy susan

[Household](#) > [Kitchen](#)

No supports needed, print slow if you want them super clean.

I could not find a utensil jar or caddy that I liked that would fit all of my cooking utensils, so I threw this together. Did it in quarters so I could make different colors. There are magnet holes near the "center" of the circle to help keep them upright.

Designed to fit these 9" turntables: https://www.amazon.com/dp/B09YND353B?psc=1&ref=ppx_yo2ov_dt_b_product_details

For magnets, I recommend doing them so that the slices all have matching polarity when lined up - i.e. if they are lined up facing the same direction, not in a circle, all the right sides will have one polarity and the left sides will have the other. That way the bins will stick together no matter which order you put them in.

LMK if you think there are easy improvements to be made, I'm happy to revise! :)
