I designed these tokens like poker chips for fun, with the number on both sides, and printed them in different colors for visual management :)

MMU strongly recommended!!!

We decided to print some token for my 4 yrs old daughter that she can exchange against some TV time or else, in order to make her understand that she can have rewards only when she behaves.

Our rules are as follow :

- she earn points when she does good things, such as :
 - helping set the table : +1 pt
 - helping cook : +2 pts
 - cleaning up her stuff : +1 pt
 - going for a bike ride : +4 pts
 - ...
- bad behavior makes her lose points :
 - yelling (oh that screeeeeee) : -1 pt

- tantrum : -3 pts
- points are redeemable for rewards. For example :
 - Watching Cat in the Hat on TV : need 5 pts
 - Watching Magic Bus on TV : need 6 pts
 - Watching The Grinch on TV : need 10pts
 - ...

Good thing is she is learning math (addition/subtraction) in the process of rewards!!
