Which laptops does it fit?

It is designed for a Macbook Pro 14" 2021 with 1.55cm height, but every Laptop with approximately this height will fit this stand.

The slit is 1,57cm wide.

Can I make it fit on other laptops?

Of course! You can scale it in your slicer to fit your needs.

Is it stable?

For maximum stability, I have widened the base in the lower section.

Prints with no supports.

How to boost the model:

- Add a self adhesive felt for a smoother bottom surface.
- Increase the infill to make it heavier.
- Buy small 2mm steel balls, pause the print after 20 layers of printing and fill it with the balls. If you return the print, the balls will be inside the model and make it even more heavy.
