### Summary

Keep your rings save when working, cooking, doing sports. Just slide them over the ring keeper and you're done!

An easy and fashionable way to keep your rings when you have to work, cook etc. Just slide the ring over the ring keeper (see the video). No need to open the necklace! It also doubles as a pretty necklace without rings.

Multicolor printing was done via Orcaslicer.

I used 0.1mm layer height and 0.35 mm line width with a 0.4 mm nozzle. print it slow (I used 50 mm/s for outer and 60 mm/s for inner walls. Add a pause at 2.6mm to insert a silver necklace (max ~ 1,5 mm thickness). Two print in around 10 min.

I included five designs. There are more to come! :)

Let me know if you encounter any problems!
